IC STAFF MONTHLY REPORT
1 - 31 March 1977

HIGHLIGHTS

- Review and comments on SSCI drafts of "National Intelligence Act of 1977" 1
- Prepared outline and suggested graphics for DCI presentation to Cabinet 2
- Briefing to NFIB on Community Planning System 5
- Preparation of Several Papers for the DCI on Classification and Compartmentation 7
- Response to OMB request for new FY 77 and 78 personnel ceilings 13
- Drafting of Section II, PRM-11 16
- Development of planning for DCI support to PRM-23 ... 17
-
- CAMS Status report 29, 30
- DIA mission and manpower analysis 36
- Nuclear proliferation intelligence report to OMB 36

MEMORANDUM FOR: Executive Officer, ICS

FROM :

Special Assistant to the D/DCI/IC

25X1

SUBJECT : Executive Staff Input to Monthly Activity
Report for Period 1 - 31 March 1977NEW ACTIVITIES1. Zero-Base Review of Federal Advisory Committees

Memoranda prepared and signed by [] to Chairmen, DCI Committees and IR&DC Executive Director asking for review and written responses to Presidential request for zero-base review of all Federal advisory committees. Office of the Comptroller is taking similar action within CIA. Will coordinate on whether one or two reports will be needed from DCI. Response due to OMB by 15 April. Action Officer: []

25X1

25X1

ONGOING ACTIVITIES1. Senate Select Committee on Intelligence

a. Reviewed four drafts of the SSCI "National Intelligence Act of 1977," prepared several talking papers for the DCI concerning the bill; met once with Bill Miller, SSCI Staff Director; and twice with Elliot Maxwell, principal drafter; reviewed comments received from NFIB Principals and from ICS offices on the second draft of the bill, and on 31 March met with SSCI staffers for a paragraph-by-paragraph review of the fourth draft. Action Officer: []

25X1

[redacted] 25X1

b. Prepared responses to 30 questions (of a total of 80) requested for the record by the SSCI for inclusion as part of the record on Admiral Turner's confirmation; coordinated with CIA representatives on their responses to questions not in the ICS package. Action Officer: [redacted]

25X1

2. PRM-11

Drafted Section II of the Task 2 report being prepared under DCI auspices as a response to PRM-11, and participated in several meetings of the Task 2 Working Group and Executive Secretariat. Action Officers: [redacted] 25X1

3. Revision of NSCIDs

The NSC Staff returned without action the package of revised NSCIDs sent forward by the Committee on Foreign Intelligence on 8 September 1976. The NSCIDs are to be brought up to date and promulgated after completion of the PRM-11 exercise. Action Officer: [redacted] 25X1

4. DCI Presentation

Prepared a detailed outline and sketches of suggested briefing charts in response to a DCI request for materials to be used in a 45-minute presentation to the President and his Cabinet. Thrust of the presentation was support the DCI and the Intelligence Community provide to other elements of the Government. Action Officer: [redacted] 25X1

STAFF ACTIVITIES

1. Briefed two foreign visitors on structure and functioning of the Intelligence Community at the request of DDO; spoke on "Functions of the Intelligence Community" at the NSA Senior Cryptologic School on 14 March, on "The Future of U.S. Intelligence" before USAF ROTC cadets at Purdue University on 20 March, and at a seminar of Industrial College of the Armed Forces students on "The Management of Intelligence Resources" on 31 March. Action Officer: [redacted] 25X1

PRC(I)-IR&DC-26/77
31 March 1977MEMORANDUM FOR: Mr. Richard J. Kerr
Executive Officer, ICSFROM: [REDACTED]
Special Assistant to the D/DCI/IC
for IR&DC Matters

SUBJECT: Monthly Activities Report

ONGOING ACTIVITIES

The Council met on 23 March 1977 and received a briefing on U.S. Satellite C³ Systems. The objective was to acquaint the Council with our systems' characteristics and capabilities to compare it with the Soviet systems, about which they were briefed previously. In addition, the Council approved the formation of an Electro-Optics Technology Subcommittee; reached general agreement that the Council would monitor National/Tactical interface issues and progress; asked for a report on results of the IHC study on intelligence communications priorities no later than July; and discussed further the implementation of recommendations of the Analytical Terminals Working Group. More Council deliberation is needed on the latter item.

25X1

The annual update of the Council's Planning Document has been further delayed due to higher priority work in the print shop. Estimated publication date is now 15 April 1977.

SECRETICS-77-1642
31 March 1977MEMORANDUM FOR: Mr. Richard J. Kerr
Executive Officer, ICSFROM: [REDACTED]
Director, Office of Policy and Planning

SUBJECT: Monthly Activities Report

I. NEW ACTIVITIES**(a) Actions Resulting from Key Intelligence Questions**

In a further action to clarify the relationship between KIQ's and DCID 1/2 priorities for the DCI, OPP traced the development of a KIQ through the formulation of a strategy report and the ensuing collection tasking. The example used in this instance was KIQ No. 2, [REDACTED] the strategy report developed in response to this KIQ and an extract from the National SIGINT Requirements List depicting the DCID 1/2 prioritization of requirements levied on NSA for collection. OPP/PPD [REDACTED]

(b) Input to Nuclear Proliferation Report to OMB

In response to a request from OPEI for information relating to national priorities associated with nuclear proliferation, OPP provided a synopsis of those DCID 1/2 topics, and their associated priorities, which can be reasonably related to this topic. This input was based on the candidate and non-U.S. supplier countries listed in the KIQ [REDACTED] Strategy Report. This action, together with total update of DCID 1/2 priorities, has additionally served to illuminate further needed refinements in the DCID topical structure. OPP/PPD [REDACTED]

II. COMPLETED ACTIVITIES

None

III. ONGOING ACTIVITIES**(a) DCID 1/2, "Current U.S. Foreign Intelligence Requirements Categories and Priorities"**

4

SECRET

E...IMPDET CL B [REDACTED]

SECRET

Following the recent approval of the basic DCID 1/2, worksheet strawman matrices depicting existing priorities were developed and distributed for review and update. The regional and functional NIO's, four DCI Committees (WSSIC, EIC, STIC, and JAEIC), and two task groups headed by DIA and State are participating in this update in order to assure a balanced view is applied to priority assignment procedure. Once these inputs are received and analyzed, the revised priorities will be forwarded to NFIB for review and approval. OPP/PPD/ []

(b) Inputs for Sections of the Draft Paper on PRM-11, Part 2

On 29 March, OPP forwarded to OPEI for inclusion in subject draft a series of papers on:

- (1) The Intelligence Community Planning System
- (2) Setting Priorities and Requirements
- (3) The National-Tactical Relationship
- (4) Compartmentation and Dissemination
- (5) Planning and Requirements
- (6) Computer Support for Analytic Functions

OPP/PPD/ []

(c) Planning System Briefing Provided to NFIB

On 28 March 1977, [] provided a comprehensive briefing to the NFIB on National Foreign Intelligence Community Planning System. The briefing included the proposed establishment of a Community Planning Committee (draft DCID 1/12) as well as the efforts underway to revise the requirements categories and priorities in DCID 1/2. OPP/ []

(d) Draft DCID 1/12 on the Intelligence Community Planning System and DCI Community Planning Committee

The NFIB Ad Hoc Group approved subject draft at a meeting on 25 March. It is now being edited and will be forwarded to the D/DCI/IC, recommending referral to NFIB for final consideration prior to publication. OPP/PPD/ []

DCI Security Committee

MONTHLY REPORT

March 1977I. Highlights

a. The Compartmentation Subcommittee completed its work on a proposed DCID entitled "Compartmentation." It contains a positive statement of compartmentation policy and limits its application to achieve optimum use of intelligence products. The proposal also includes guidance for decompartmentation of all information which does not reveal such sensitive details. There are Community objections concerning the jurisdiction of the Subcommittee in the matters of compartmentation as well as to the substance of the draft DCID itself. This DCID will be discussed at the April Security Committee meeting after comments are received from the SIGINT Committee and COMIREX.

b. The study on compartmentation and secrecy which was forwarded to the D/DCI/IC for comments has now been returned. Steps are now being taken to initiate implementation procedures where possible.

c. A review of classification and compartmentation was prepared for DCI use in a future meeting with Vice President Mondale. Contributions were received from DIA, Department of State and the DDO/CIA.

d. Three papers have been prepared for use in the PRM-11 study. These papers have dealt with the measures available to the DCI for the protection of sources and methods, his role as the protector of sources and methods and a description of the relationship between compartmentation and dissemination

II. Work in Progress

a. The Security Awareness Working Group is currently developing an outline of security programs utilized in the Intelligence Community for processing new employees, on-board employees and terminations.

25X1

b. At a joint meeting of the R&D Subcommittee and the Audio Countermeasures Working Group, representatives of the [redacted] presented a briefing on a method they developed which could be used for clandestine eavesdropping. This meeting was held at the Interagency Training Center in order to facilitate "live" demonstrations of this method.

25X1

c. A new Chairman of the R&D Subcommittee was recently approved by the D/DCI/IC. Dr. Philip K. Echman, Director, Office of Research and Development, CIA, entered the Agency in 1977 from [redacted]

25X1

d. Comments were prepared for the D/DCI/IC on proposed bill H.R. 89 which would largely codify into law E.O. 11652. Also, proposed legislation was prepared defining and protecting sources and methods information, together with a critique of prior legislation proposed along the same lines in H.R. 12006.

-- Detailed questions on ADP and Telecommunications (ADP-T) plans, programs and projects have been levied on individual Program Managers by the Senate Select Committee's Budget Authorization Subcommittee. This reemphasizes the need for comprehensive community-wide planning previously called for by the PRC(I) and OMB and forecast in the DCI's Perspectives. The IHC will prepare a report to the PRC(I) -- due in June 1977 -- to recommend short and longer-range steps for top management to adopt in order to lead the Community toward the implementation of comprehensive community-wide ADP-T capabilities. (U)

WORK IN PROGRESS

1. Imagery Transmission System - Washington (ITS-W). The [] locations designated to receive equipment in the ITS-W initial network have all formally confirmed their desire to participate. These [] locations are: NPIC at [] [] White House/Situation Room; State Department; Pentagon (NMIC/NMCC); CIA Headquarters; NOSIC, Suitland; and NSA, Ft. Meade. [] stations are being procured, and CIA and DIA have each requested that they be assigned stations [] with both of these sets of equipment to be located at []. This will have the effect of providing three stations in that building, to interconnect three large distinct groups of imagery interpreters (NPIC, DIA, CIA) separate substantive analyst populations. Chairman IHC originally recommended three stations at [] but until recently, it had been impossible for fiscal reasons to ensure that a total of [] sets of equipment could be procured. This issue is likely to be resolved in the near future. IOC of the entire initial system is anticipated near the end of calendar year 1977.

2. Watch Office Chiefs Conference, 28-29 April 1977. Arrangements have been made with the Federal Preparedness Agency (FPA) for the fourth meeting in a continuing series of conferences of Intelligence and Operations Watch Center Chiefs, [] Virginia, on 28-29 April 1977. In addition to attendance by representatives from the military operations, intelligence, and foreign affairs communities, a small representative group from civil departments and agencies will also attend. The theme of the conference is to outline a National Crisis Operations System and to explore ways to improve information exchange among government organizations brought together by

SECRET

SECRET

25X1

their ad hoc participation in response to a common crisis situation. In addition to discussion sessions on the theme of the conference, participants will receive a briefing on the FPA facility and the methods for reconstitution of the government in the event of an emergency. (C)

3. Collaboration with STIC on Appraisal of Exploitation of Soviet S&T Literature. The IHC has joined the STIC in an effort to review procedures and methods used by the Intelligence Community to exploit Soviet scientific and technical information available through open sources. Methods of collection, distribution, indexing and retrieval of Soviet scientific material will be reviewed both within the Intelligence Community and other governmental organizations, as well as contractor and commercial sources. The object is to determine whether more intelligence can be obtained from open source foreign literature through better methods of collecting and organizing the data extracted in machinable form. It is anticipated that conclusions drawn from this sample review will be applicable to other open source literature intelligence (LITINT). (U)

4. CONTEXT Data Terminals. For the past several months, [] under contract with NSA, has worked on the problem of securing all of the CONTEXT terminal equipment against electronic radiation and emanations (TEMPEST) limits, as required by national security regulations. Based on tolerance limits specified by DIA, State, and CIA, the [] has succeeded in TEMPEST-proofing the CONTEXT terminal to the []. Based on these successful tests, it will now be possible to proceed with the installation of the secured units in the Pentagon, State Department, and at []. Once these installations are made and tests accomplished, NSA will replace the Ft. Meade and CIA Langley present units with the TEMPEST-proofed equipment. (C)

5. CONTEXT Voice System. Problems have been encountered over the past few weeks with the addition to the network of a CONTEXT secure dedicated voice unit at [].

The CIA Office of Communications (OC) has been working diligently to trace and correct the problems. They have also kept the NSA [] involved and informed as required. OC agrees that work on this phase of CONTEXT may require several weeks in order to perform the services and testing needed to assure that all stations will operate in a reliable manner. (C)

SECRET

25X1

6. IHC Telecommunications Working Group. The IHC activity to coordinate the Community in developing a prioritized analysis of intelligence user requirements for satellite communications is well underway, as is a companion study by the Defense Telecommunications, Command and Control (DTACCS) organization to examine alternative communications capabilities. IHC and DTACCS representatives are working in close coordination. A status report was provided for the IR&D Council in February and again in March 1977. Other reports are planned for May to the WWMCCS Council and the PRC(I). A further report to the IR&D Council is due in July. Intelligence agency-validated crisis communications requirements are due in from the four principal IHC sub-working groups in April, and our current monitoring of their progress indicates that the schedule should be met. These inputs from the major system program managers will then be reviewed by representatives of the intelligence producing community. (S)

7. Community ADP and Telecommunications Planning. The Congress, the OMB, and the PRC(I) have all made known their deep concern about the current and future status of ADP and Telecommunications (ADP-T) throughout the Intelligence Community. During March, a long and detailed series of questions has been addressed to Intelligence Program Managers by the staff of the Budget Authorizations Subcommittee of the Senate Select Committee on Intelligence. This source has also directed the following question to the D/DCI/IC (ltr dtd 29 March 1977):

"What are the programs and issues to be addressed in FY 1978-79 by the Information Handling Committee?"

An 18 January 1977 letter from the Director OMB advised that OMB would direct particular emphasis this year to the following:

"The Intelligence Community should develop a coordinated approach to the development of computerized data bases that maximizes the rapid and free flow of information vital to the quality and timeliness of the intelligence product and minimizes the duplication in both data files and ADP equipment."

During the past month, the IHC Staff has been active in drafting a tentative program outline to address these large issues. A full meeting of the IHC has been set for 6 April to work out task assignments and an action program. A summary appraisal of this problem has been submitted for inclusion in the NSC-directed PRM-11 study of Intelligence Structure and Missions. Status reports on this issue are to be provided to the PRC(I) in May and June. (U)

SECRET

DCI/IC 77-4245

28 March 1977

MEMORANDUM FOR: Executive Officer, Intelligence
Community Staff

FROM: Director, Office of Program and Budget
Development, Intelligence Community
Staff

SUBJECT: Monthly Activity Report: 1-31 March 1977

I. COMPLETED ACTIVITIES

A. Congressional Hearings

1. During February and March OPBD supported the appearances of the DCI and D/DCI/IC before the Senate Appropriations Committee and the D/DCI/IC before the House Armed Services Committee, the Senate Select Committee (Intelligence) and the House Appropriations Committee. These appearances entailed the defense of the FY 1978 NFIP budget preliminary to the appearance of the program managers. (OPBD/A11)

2. All OPBD program monitors and evaluators attended at least one of their prime budget hearings and assisted in the process of answering questions for the record as a result of the hearings. All answers to questions were cross-referenced to insure consistent answers to all Congressional committees. (OPBD/A11)

B. Civilian Personnel Ceilings:

The initial staffing of the PRC(I) position on OMB Bulletin 77-7 directed at the establishment of new FY 77 and FY 78 civilian ceilings has been accomplished. (OPBD/

C. Data Base Support:

1. The CIRIS data base was employed to provide timely responses to requests for Community resource and historical trends data from DIA, OPP/PPD, OPEI/PAID, OPEI/HRD and NIO/SP. (OPBD/DSG/A11)

SECRET

) SECRET)

2. The DCID 1/2 Data Base, created by DSG to support OPP and the Ad Hoc Committee, was used to produce numerous analytical review displays for the current update of priorities and requirements value. An independent analysis of DCID 1/2 "strawman" priorities compared with CIRIS resource allocation showed a correlation exists for major countries but is not apparent for topics. (OPBD/DSG/All)

D. Intelligence Oversight Resources:

A report of the manpower and funding levels within the DOD and CIA used for intelligence oversight activities was furnished to the staff of the House Appropriations Committee. (OPBD/)

II. ONGOING ACTIVITIES

B. Zero Base Budgeting (ZBB):

During February and March, a review of the ZBB theory and the experience at was completed. An OMB briefing on implementation of ZBB has been received and a scheme for the NFIP response to OMB directives is being undertaken. A basic briefing on the nature of ZBB and how it might be integrated into the NFIP budget cycle, including budget cycle procedures, program evaluation mechanisms, data processes for cross-program trades and proposals for Congressional justifications, is being prepared. (OPBD/)

WORKING PAPER
4 April 1977OPEI Monthly Activity ReportI. New ActivitiesA. Responses to SSCI Questions

Provided responses to SSCI questions for D/DCI/IC's use in testifying before that Committee.

Action Offices: All Divisions

B. PRM-10 HUMINT Net Assessment

Specific terms of reference for the HUMINT aspect of the PRM-10 net assessment on Soviet-US intelligence capabilities were prepared and arrangements made with appropriate Community elements for inputs to the study.

Action Offices: HRD and PAID

C. DCID 1/2

Provided OPP inputs on terrorism and CI priorities for the revision of the DCID 1/2 worldwide priority matrix obtained from the FBI and the CI components of DoD and CIA and comments on category changes in the matrix.

Action Offices: HRD and ID

D. Discussion of Antisatellite Limitations

A draft paper for Secretary Vance's Moscow briefing book prepared by the Arms Control and Disarmament Agency (ACDA) on possible discussions regarding anti-satellite (ASAT) limitations was received for comment. Following circulation for comment, an Intelligence Community response was prepared and forwarded to ACDA.

Action Offices: IS, ID and SD

TOP SECRET

25X1

II. Ongoing ActivitiesA. Southern Africa Issue

Following discussions with collectors and policy intelligence users about deficiencies in Intelligence Community reporting on Sub-Saharan Africa, the findings are being packaged for three DCI collection committees for the issuance of tailored guidance to field collectors. In preparation are Intelligence Community Staff views concerning an appropriate resource mix to achieve improvement in Community coverage of the area.

Action Offices: HRD, ID and SD

B. PRM-11

Participating in working group review of Intelligence Community organization.

Action Offices: All Divisions

C. FTD All Source Study

In October 1976 FTD completed its All Data Source Study. The objective of the study was to provide an in-depth understanding of systems analysis potential using all sources in a data denial environment. The

views on the key policy objectives and issues in US relations with Syria. Written comments on this subject have been solicited from the Defense and Treasury Departments.

2. Revised FOCUS Review Procedures. The HRC is developing revised procedures for the conduct of the FOCUS Review Program. The new procedures are designed to make FOCUS Reports more meaningful to US Missions abroad in the improvement of intelligence collection efforts. The new procedures would clearly define the role and contribution of NIOs to FOCUS, thereby making the FOCUS Reviews more consistent and balanced in content.

C. ONGOING ACTIVITIES

1. National Foreign Intelligence Plan for Human Resources (NFIHR). The draft plan now is circulating among the departments and agencies represented on the HRC for final approval and is expected to be sent to the DCI for approval shortly. Accompanying the request for approval is a recommendation that the plan be distributed to the NFIB for noting and advice.

2. National Guidance and Requirements Program. The Guidance and Requirements Subcommittee has begun its initial draft. The Program would establish procedures for the formulation, coordination and issuance of timely guidance and requirements for the collection of intelligence information from human sources in support of selected national needs.

MONTHLY ACTIVITY REPORT

I. NEW ACTIVITIES

A. PRM-10: Net Assessment of Intelligence Capabilities

Prepared Terms of Reference for this task which will review and analyze past, present and possible future trends in US and Soviet intelligence collection capabilities against worldwide targets. An OPEI task force has been formed to coordinate the Community's effort. Preliminary report is due 1 May. Action Officer: PAID/

B. Nuclear Proliferation Data Base

The strategy report for KIQ-5 (Nuclear Proliferation) assigns to the IC Staff, in collaboration with the NIO/NP, the task of developing specifications for an all-source data base for nuclear proliferation intelligence. A Data Base Working Group for Nuclear Proliferation (DBWG/NP) was established for this purpose, chaired by the Chief, PAID and composed of representatives from CIA, DIA, ERDA, NIO/NP, State/INR and JAEIC. The initial concerns of the working group are: defining the data base issues; developing a coordinated Community plan for resolving these issues; ensuring there is no unnecessary duplication among Community elements in data base activities. Action Officer: PAID/

II. ONGOING ACTIVITIES

A. Coordination of National Warning and Crisis Intelligence Support

Draft paper containing problem analysis and recommended action program is in circulation for informal comment by the Community and DCI staff officials. Comment received to date (DIA: VADM Inman, NSA: [redacted] CINCLANT: Captain Butts) is favorable. Problem analysis also used as basis for PRM-11 input on warning and crisis management. Correspondence prepared for DCI consideration directing establishment of an NFIB working group to address, inter alia, implementation of proposed initiatives. Action Officer: PAID/[redacted]

B. Intelligence Support to NRC

NRC intelligence requirements, including time-sensitive, formally transmitted to D/DCI/IC for certification by JAEIC and dissemination to Community production agencies. However, State advises it is now preparing official guidance for Executive Branch support to NRC under E.O. 11902. Specifics of such guidance being negotiated between State and NRC. Further IC action being held in abeyance pending resolution of this matter. Action Officers: PAID/[redacted]

C. Technology Transfer

PAID continued its survey of intelligence production in the field of technology transfer. An outline of the major questions to be answered in connection with technology transfer to the Soviet Union was received from the Analytical Support Center (Mathematica). Action Officer: PAID/[redacted]

D. DIA Mission and Manpower Analysis

As part of PAID's ongoing review of DIA mission and manpower, prepared an analysis of the Agency's needs for civilian supergrade positions and exemption from certain Civil Service Commission regulations. Analysis is to be forwarded by D/DCI/IC to DIA. Action Officers: PAID/[redacted]

E. Nuclear Proliferation Intelligence Report to OMB

OMB has requested the IC Staff to make a review of its nuclear proliferation intelligence activities and develop a coordinated plan by early April 1977. A draft of the review has been prepared and is currently in "review for comment" by appropriate elements of the Community. The main objectives of the report are to inform OMB of the current nuclear proliferation intelligence activities and plans of the Community, and to highlight the salient proliferation intelligence issues, namely, the Community division of labor and the nature and status of the data base required. The review will be circulated to NFIB members before dispatched to OMB. Action Officer: [redacted]

F. Memorandum of Understanding on the Provision of Military Operational Information for the Production of a National Intelligence Situation Report

Based on comments received from Tom Latimer, a revised Memorandum of Understanding (M/U) was prepared and forwarded to him. If the SecDef and C/JCS informally approve the M/U as currently drafted, the DCI would forward it for signature. Once signed, the relevant information would be incorporated in the National Intelligence Situation Report procedures which would be forwarded to NFIB principals for concurrence. G. I&W in Korea and General Vissey's Proposals

DIA held a status report meeting on 4 March to discuss the findings of those elements assigned action on General Vessey's proposals. A written report is being prepared and a copy will be provided to the IC Staff. Appropriate elements on the Staff will then be provided the report in keeping with our intention to monitor DIA's action and assess the cost involved for any new activities. Action Officer: PAID/

III. COMPLETED ACTIVITIES

[redacted]

Coordinated with OSR a reply to a recent [redacted] query regarding the status of OSR's efforts to exploit the [redacted] methodology on this subject. Action Officer: PAID/[redacted]

B. Strengths and Weaknesses of the Intelligence Community

Prepared a memo for the DCI replying to some recent comments from the Deputy Director, Planning and Evaluation, OSD on this subject. Action Officer: PAID/[redacted]

C. Intelligence Community's Analytical Resources Covering North Korea

Prepared a brief summary on the Intelligence Community's analytical resources covering North Korea for the NIO/East Asia and Pacific. The info, along with a covering memo from the NIO, was given to US Ambassador Snedder (Korea). Action Officer: PAID/[redacted]

D. CCPC Study on "Review of Intelligence Activities Against North Korea"

Provided Working Group Chairman an input on intelligence analytical resources covering North Korea; also participated in several working group meetings which addressed intelligence production resources. Initial draft of the entire document is near completion and will be distributed for comment and review in early April. Action Officer: PAID/[redacted]

E. Sub-Saharan Africa

Interviews with the managers of analysts in CIA, DIA, State/INR, and NSA who follow Sub-Saharan Africa have been completed. The level of analytical effort the Community is expanding in this area in light of the FY 77 national intelligence requirements and the high interest in Africa expected from the new Administration has been reviewed and the information will be provided to HRD for inclusion in their study of Sub-Saharan intelligence resources and requirements. Action Officer: PAID/[redacted]
